

Pilot in Command Policy Statement

It is the policy of the Paine Field Chapter of the WPA to require that both the CFI and the FAA Wings participant discuss the PIC issues and agree who will assume that role during all phases of flight.

Factors that will impact on this issue include:

1. Aircraft configuration (i.e. single control airplane).
2. Aircraft equipment/certification (IFR/VFR).
3. Currency of the participant in IMC/VMC.
4. Personal desires of the CFI and participant.
5. Weather conditions.
6. Change of control of the airplane.
7. Aircraft Insurance.

This statement of policy must be discussed, signed by both the CFI and the participant and returned to the dispatcher prior to departure.
